THE WHITE HOUSE
WASHINGTON

RECEIVED
2013 JUN 10 AM 6:32
OFFICE OF THE
EXECUTIVE SECRETARY

June 7, 2013

Dear Agency Representative:

The Office of Presidential Correspondence received the enclosed letter to President Obama, which appears to fall within the jurisdiction of your agency. The White House has no view on the merits of the request presented by the letter. We encourage you to respond to the letter within 30 days, if a response is appropriate under your standard policies. If your agency does respond, please indicate in the response that the letter to the President was forwarded by the White House to your agency. In addition, please reply directly to this message (Casework@Correspondence.WhiteHouse.gov) with an informational copy of the response for our records. If your agency chooses not to respond, please reply directly to this email indicating that decision for recordkeeping purposes.

You may contact Galen Main at the White House Office of Presidential Correspondence by email at GMain@who.eop.gov or phone at (202) 456-2176.

Message:
Mr. President:

A couple of June's ago, you came to Kalamazoo to wow the Kalamazoo Central graduates and encourage them to be the best they can be. Shortly, the EPA is expected to announce that they are not going to clean up a landfill spanning 45 acres contaminated with PCB's a landfill that has no liner on any side presently and EPA plan that just caps the top. The site is in the heart of Kalamazoo where most residents live and the cost to do "the right thing", remove the PCB contaminated dirt is LESS than LaBron James' gets paid to play basketball or Justin Verlander gets paid to play baseball. The landfill sits over groundwater that is presently not contaminated and provides 1/2 the water for 120,000 county residents! An earthquake could instantly change that situation for the worse. FEMA order millions of blankets for New Madrid, MO. There is no rock between Missouri and Michigan to stop the wave and when that wave hits, landfills will tumble, PCB's will stumble and we'll have a real mess on our hands for this and future generations that can be prevented by spending LESS than we pay LaBron or Justin to play a sport. Mr. President - can you intervene to get the EPA to do the right thing?
